

## General conditions

### I. The project

This call is part of the “COMIC ART EUROPE” project.

The “COMIC ART EUROPE” project is a pilot project bringing together four European organisations representing different elements of the comic book ecosystem: a higher education institution, festivals and a museum. It aims to strengthen the comic book sector in Europe by experimenting with collaborative working methods. It promotes the transnational mobility of artworks, workers and creators as a means to significantly upscale the work. It prefigures a European comics community capable of positioning creators and organisations at a European level and challenging the historical dominance of the American and Japanese giants.

The project will experiment with professional training methods (summer camp and residency pathways), creative assistance (grants and residencies), dissemination of results in Europe and outside Europe (European comic book catalogue, large-scale dissemination channels) and research about the transformational power of comics (through literacy workshops with comics).

This project, supported by the European Commission, runs from 1 September 2020 to 31 December 2023.
